

Co-Location Services

excell[®]

Co-locating your servers at our secure facility gives your business the ability to expand its e-commerce and data processing capability as quickly and as easily as your business demands

Our secure, temperature controlled sites throughout London are an ideal place to host your business critical services.

Benefits at-a-glance:

- 1. Reduced costs:** Co-location with Excell offers not only greater space savings, but time, money and efficiency savings too.
- 2. Economies of scale:** House your mission critical systems in a shared infrastructure paying for your portion and benefiting from 'the whole'
- 3. Security:** Security and operations staff keep your systems functioning smoothly, safely and securely with our infrastructure redundancy measures providing additional peace of mind
- 4. Disaster recovery:** Having your mission-critical systems stored safely off-site means that if something happens to your offices, the core of your business will carry on going
- 5. Freedom:** Freedom to focus on your core business rather than IT infrastructure and freedom to use your internal networks for a multitude of other functions without the prohibitive costs
- 6. Reduced carbon footprint:** Co-locating with a shared infrastructure reduces your carbon footprint in line with your company's green policies
- 7. Speed:** Benefit from the strength of our bandwidth
- 8. Complete control:** All hardware and software associated with the service is your property - you decide how powerful you want it, what operating system you want and every other aspect of its design and setup

"A flexible solution for your IT infrastructure with peace of mind in every eventuality"

Once your server is set up in our racks, we provide an IP address, bandwidth and power - enabling you to access it as you would a secure website.
