

EXCELL INTELLIGENT TRUNK

The economic climate has led to a reduction in ICT budgets. How will your organisation reduce costs whilst providing an agile, scalable and resilient infrastructure to maintain a competitive business advantage?

THE SOLUTION

Excell Intelligent Trunk provides a cost effective gateway to the future by leveraging the power of a highly resilient Intelligent Next Generation Network, utilising reliable ISDN/PSTN technology.

This will seamlessly offer your organisation cost savings, control and management of inbound calls, flexible bandwidth, business continuity and improved business efficiency.

Winners of the 'Enterprise Managed Service Solution', 2009, Comms National Awards

BENEFITS

- Multiple DDI number ranges can be added
- UK wide number portability
- Presentation numbering – per DDI number
- Fax transmission guaranteed
- Simultaneous ringing of devices e.g. fixed and mobile
- Voicemail to e-mail forwarding

TECHNOLOGY

Excell Intelligent Trunk utilises standard ISDN interfaces to connect to all legacy PBXs and IP-PBXs. Calls are routed over a high capacity fibre circuit, breaking out to the PSTN over resilient Tier 1 carrier interconnects - offering the lowest cost call rates. The Intelligent Trunk enables multiple streams providing high quality voice and high capacity Internet access.
